PHOENIX
engineering and consulting, inc

phoenixengineering.com

- Truss spanner systems

- Design assistance and approval

- Speaker and monitor rigging

- Fly point rigging attachment locations

- Connections and bracing configurations

We can solve the problem and make it go away.

Phoenix Engineering and Consulting, Inc. has a wealth of experience in Staging and Rigging engineering and can handle projects of any size and scope. This experience ranges from large venue preparation for major events to providing local venues with precise rigging load plots. Our staff of Professional Engineers will work with you to provide the most effective and efficient solutions for you and your clients. We know a box truss from a spanset.

Got a gig coming up? Call Phoenix today and let's discuss how we can use our expertise and experience to help you out.
